Dalton Transactions

- The first **weekly** inorganic chemistry journal
- **New format** – browse articles quickly
- Current impact factor **2.926**
- **Fastest times to publication** in the field
- **International** readership and authorship

Recent papers include:

Platinum(II) complexes bearing 1,1'-bis(diphenylphosphino)ferrocene as building blocks for functionalised redox active porphyrins

L. Monsù Scolaro, M. R. Plutino, A. Romeo, R. Romeo and G. Ricciardi, *Dalton Transactions*, 2006, (Advance Article) DOI: 10.1039/b516391a

Synthesis and electrochemical studies of a covalently linked cobalt(II) phthalocyanine-cobalt(II) porphyrin conjugate, Z. Zhao, K. I. Ozoemena, D. M. Maree and T. Nyokong, *Dalton Trans.*, 2005, (7), 1241 DOI: 10.1039/b418611g
