ORUS

"HALF DEGREE FOR THE PLANET"

The University of Messina adheres to "*M'illumino di Meno*" with the initiative "Half a Degree for the Planet".

The action, for promoting energy savings and environmental sustainability, involves for the week of February 16th to 20th:

- lowering the supply fluid temperature of heat generators by 5 °C and reducing the temperature of centralized ambient thermostats by 0.5 °C;
- turning off the lights at night in the Rectorate and in the UniMe Cultural Center (formerly the Bank of Italy).

A small effort for a great commitment.

"WARM THE FUTURE, NOT THE ENVIRONMENT!"
