ABOUT ME

I have strong communication skills, developed both during my university years and during my career, where I had the chance to get to work with big groups. I have a go-get attitude and I am able to adapt to each situation, which allows me to collaborate with others in reaching a common goal. I am strongly detail-oriented and the team leading positions I covered in my past working experiences helped me develop organizational & management skills. In the past I also owned a IT store where I learnt how to overcome difficulties on my own and how to deal efficiently with customer requests. I take pride in the professional attitude I have towards my work. I am reliable and hard-working, with good time-keeping and organizational skills. I am open-minded and have a strong desire to take on new challenges.
