Corso di Studio Magistrale a Ciclo Unico in
"Medicine and Surgery"

Classrooms

Teaching activity takes place in the classrooms belonging to the three Departments which are part of the Interdepartmental Connection Structure (ICS) called the "Faculty of Medicine", located at the "Policlinico Gaetano Martino" University Hospital: the Department of Biomedical and Dental Sciences and Morphological and Functional Images, the Department of Clinical and Experimental Medicine, and the Department of Adult and Childhood Human Pathology "Gaetano Barresi".

New classrooms and laboratories have recently been constructed that offer cutting-edge medical technologies and modern multimedia equipment. This was made possible by various framework agreements stipulated with the completion of specific open procedures. Teaching and related services have been enhanced by these improvements and offer students the most up-to-date learning experiences.
