

Ciclo XXXIV

Dott. Giuseppe Tomasello

- Porcino D.D. and Tomasello G. (2019). "Shear wave velocity-based evaluation of liquefaction resistance for calcareous sands of different origin". *Soil Dynamics and Earthquake Engineering*, 122(2019), 235-247. <https://doi.org/10.1016/j.soildyn.2019.03.019>.
- Porcino D.D., Mauriello, F., Bonaccorsi, L., Tomasello G., Paone, E., and Malara M. (2020). "Recovery of Biomass Fly Ash and HDPE in Innovative Synthetic Lightweight Aggregates for Sustainable Geotechnical Applications". *Sustainability*, 12, 6552; doi:10.3390/su12166552.
- Porcino D.D., Triantafyllidis, T., Whichtmann, T., and Tomasello G. (2021) "Application of a critical state approach to cyclic liquefaction resistance of sand-silt mixtures under simple shear loading". *Journal of Geotechnical and Geoenvironmental Engineering*, 147(3). DOI: 10.1061/(ASCE)GT.1943-5606.0002470.
- Porcino D.D., Wichtmann, T., and Tomasello G. (2019) "An insight into the prediction of limiting fines content for mixtures of sand with non-plastic fines based on monotonic and cyclic tests". *Proceedings of 7th International Conference on Earthquake Geotechnical Engineering, ICEGE, 17-20 July 2019, Rome, Italy. Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions. Silvestri and Moraci (Eds).*
- Tomasello G., and Porcino D.D. (2019) "Analisi del comportamento monotonic non drenato di sabbie con fine non plastico in termini del parametro di stato". IX Incontro Annuale dei Giovani Ingegneri Geotecnici (IAGIG), Napoli, 10-11 Maggio 2019.
- Tomasello G., and Porcino D.D. (2021). "Predicting undrained cyclic simple shear response of sand-silt mixtures: a critical state approach". *Incontro Annuale dei Ricercatori di Geotecnica 2021 (IARG2021_online)*, 28 Settembre 2021. (RELATORE)
- Porcino D.D., Tomasello G., Bonaccorsi L., Mauriello F., Malara A., and Marciano' V. (2022) Caratterizzazione di nuovi aggregati sintetici per impieghi in campo geotecnico (Characterization of innovative synthetic lightweight aggregates for use in geotechnical applications). Contributo accettato per XXVII CNG, Reggio Calabria, 9- 11 February 2022.
- Porcino D.D., Farzalizadeh R., and Tomasello G. (2022). Pore-Pressure Generation in Undrained Cyclic Loading Simple Shear Tests: An Energy Approach. Accepted abstract for 4th International Conference on Performance-based Design in Earthquake Geotechnical Engineering (PBD-IV), Beijing, China, 15-17 July 2022.
- Porcino D.D. and Tomasello G. (2020) "Exploring static instability behaviour of sand-fines mixtures based on different state variables". *Lecture Notes in Civil Engineering*, Volume 40, 2020, Pages 592-599, Publisher:Springer Nature.
